Product Operation:

### LAPTOPMATE

- The Laptop-mate makes a handily sized portable companion to a travel laptop.
- When the cord is retracted, it is stored neatly out of sight within the mouse body, making it easy to pick up and go for travel.
- The unidirectional retractable mouse is no bigger than the typical wireless optical mouse, and does not require a separate power source the way wireless devices do.
- USB plug & play connection.

### DESKTOP

- It may also be used with a desktop computer, with a USB retractable extension cord.

## Mouse Comparison Photos:

1- *A traditional mouse with cord on the left. Ours is shown on the right.*

*Ordinary USB cable for mouse*

*I-more unidirectional retractable mouse*

2- *One cordless mouse with battery and receiving port or dongle on the left. Our mouse is shown on the right.*

*Wireless mouse with dongle / battery*

*I-more Retractable cable mouse*

The embedded unidirectional retractable cord allows for easy and light mouse movement.

It is ergonomically designed for comfort, with sleek modern graphics and colors.

Optional accessory: a light carrying case for travel.
